

TORAH AND TRADE

Until the age of 14, children learn in the Talmud Torah. Then they are divided, according to their individual vocations and talents ; part of them continue their studies in our Yeshiva Ketana, where they are being prepared for studies in the great Yeshivos of Jerusalem, and part of them are being taught different trades in the workshops affiliated to our institution, or, in case of necessity outside.

Also those who are learning trades, are receiving, in the afternoon, lessons of Torah, mathematics etc.

The money earned during their work remains in the institution, and, when they leave the orphanage, their deposits ,are returned to enable them to establish their own lives.
