## on a hill in Jerusalem

High on a broad and sloping hillside, overlooking the grandeur and majesty of the Holy City, eight panoramic acres have been acquired for construction of the most magnificent Torah Center and residence halls in modern history. Conceived and designed by Israel's foremost architects, this group of buildings will be ultra-modern, yet enduringly beautiful, a proud and inspiring sanctuary of Holiness. • The new Hebron Yeshiva will constitute a completely integrated community with elaborate study halls and synagogues, libraries, spacious dining rooms and

cafeteria, kitchens, laundry, and over four hundred dormitory rooms on its campus. • This new Torah Center will accommodate a thousand students, research workers and an expanded faculty. With the aid of those who dedicate themselves to support our sacred citadel of Israel's glory, here will emerge the outstanding Torah academy of modern times. • In this greater Hebron Yeshiva that you help to build, the eternal treasures of our past will be richly present to safeguard the future.
